

Applied Measurement & Control is Named NYS Representative for Ircon

Applied Measurement & Control (AM&C) of Victor, NY, is pleased to announce it has been named the exclusive upstate New York representative for **Ircon**, effective June 1, 2008.

AM&C also represents **Raytek Corp.** which is owned by Fluke Electronics, a division of Danaher Corporation. These leading names in non-contact infrared temperature measurement, **Raytek** and **Ircon**, became one company in 2006.

Raytek and **Ircon** together offer a complete IR solution, including the industry's most complete line of infrared sensors, line scanners and process imaging systems. **Ircon** and **Raytek** customers will continue to enjoy the same high level of technical innovation, quality and service as before.

Having represented **Raytek** since 1999, AM&C sales engineers offer their customers over fifty years of in-depth infrared temperature measurement application experience.

"Both **Ircon** and **Raytek** customers are the real winners here for two reasons." This is according to Sam Messer, President of Applied Measurement & Control. "The technologies and products from both companies are complimentary, and with AM&C as the sole exclusive representative for **Ircon** and **Raytek**, almost every non-contact temperature sensing application can be solved with one call," said Messer.

With offices around New York State, Applied Measurement & Controls is strategically positioned to help industry solve challenges in their manufacturing processes. Messer states, "With over fifty years of infrared temperature application experience, and two industry leading product lines to chose from, our sales engineers are well equipped to ensure that our customers are getting the best value for their money."
